WONTECH JAPAN 株式会社

Company Description

WONTECH JAPAN Co., Ltd. is the Japanese subsidiary of WONTECH Co., Ltd., a pioneering medical laser and ultrasound equipment manufacturer established in South Korea in 1999. The Japanese subsidiary was founded in August 2017 and is headquartered in Hatchobori, Chuo-ku, Tokyo. WONTECH JAPAN specializes in the import, sales, distribution, and technical support of state-of-the-art aesthetic and medical devices—such as advanced lasers and radiofrequency (RF) systems—tailored specifically for dermatology, aesthetic dermatology, plastic surgery, and cosmetic surgery clinics across Japan.

The parent company, WONTECH Co., Ltd., has achieved steady global growth by overcoming the limitations of domestic technologies and avoiding reliance on foreign technology. From its inception, the company has prioritized rigorous technological localization and innovative development. To sustain this, WONTECH allocates approximately 50% of its workforce to Research and Development (R&D) and consistently reinvests more than 15% of its annual revenue into future product development and cutting-edge facilities. Thanks to this powerful R&D drive, the company has successfully commercialized globally recognized devices including "PICOCARE," "Pastelle," "The Oligio," and "Sandro Dual," earning numerous regulatory approvals from agencies such as the U.S. FDA, European CE, and Japan's PMDA. Consequently, its business network has expanded rapidly beyond South Korea to major markets including Japan, China, the United States, Europe, and the Middle East, establishing a strong presence in over 40 countries worldwide.

As the Japanese corporate entity, WONTECH JAPAN is currently leveraging this exceptional technological foundation to aggressively expand its market share in Japan. Operating under a strict quality management system aimed at "zero defects," the company places customer satisfaction as its utmost priority by offering prompt, reliable, and high-quality field engineering and maintenance services. The organization fosters a dynamic working environment where diverse professionals—including strategic sales representatives, field service engineers, medical affairs experts, and accounting specialists—collaborate closely. Upholding the core values of continuous technological innovation, a transparent management system, and corporate social responsibility, WONTECH JAPAN remains dedicated to supporting human health and beauty while striving to solidify its position as a trusted global leader in the medical device industry.
