Job Description

Join a forward thinking Technology Management Division that powers enterprise wide IT and cybersecurity initiatives, building a strong and secure digital foundation for innovation. The Corporate IT Infrastructure team delivers reliable, high performance global systems that keep the business running seamlessly. As a SAP Senior Application Specialist, you'll take the lead in designing and optimizing SAP solutions (S/4HANA FI/CO, AA, PS), turning complex business needs into smart, scalable systems. If you're passionate about driving impact, collaborating across global teams, and shaping enterprise technology strategy, this role offers the platform to make it happen.

- Lead the design, configuration, and deployment of SAP modules, particularly Materials Finance (FI/CO), Asset Accounting (AA), and Project Systems (PS)
- Serve as the Subject Matter Expert (SME) for SAP application architecture and system integrations
- Analyze business requirements and translate them into functional specifications and technical solutions
- Drive system enhancements, upgrades, and transformation initiatives, including S/4HANA migration
- Collaborate with cross-functional teams to align IT solutions with business processes

- Manage and resolve complex incidents, conduct root cause analysis, and implement preventive measures
- Support audit and compliance activities, including documentation and system validation
- Mentor junior SAP analysts and deliver user training when required

Required Skills

- 7+ years of hands-on experience in SAP ERP (ECC or S/4HANA), including at least two full-cycle implementations
- Strong expertise in SAP modules such as FI/CO, Asset Accounting (AA), or Project Systems (PS)
- Solid understanding of finance-related business processes
- Proven problem-solving ability and capability to work independently in a fast-paced environment
- Strong communication skills in both Japanese and English

Desired Qualifications:

- SAP certification in one or more relevant modules
- Experience with SAP development and integration tools (e.g., ABAP, BTP, PI/PO, IDoc, BAPI)
- Hands-on experience with SAP Fiori and SAP Analytics Cloud
- Familiarity with ITIL practices and project management methodologies (Agile/Waterfall)
- Understanding of Japanese business practices and regulatory requirements
- Experience working in a global or matrixed organization
