Job Description

Join a high impact data analytics and platform team within a global technology organization. This organization spans e commerce, fintech, telecommunications, and media, reaching millions of users worldwide daily. You'll work with massive real-world marketplace data, designing large scale data platforms, building advanced analytics and AI solutions, and addressing challenges that directly impact customer and business growth, such as fraud detection. Your work will be central to decision-making, transforming data into smarter strategies, better products, and tangible results that people around the world can experience.

Responsibilities:

- Design, develop, and maintain applications using the ABAP language on SAP S/4HANA.
- Collaborate with other developers, architects, and stakeholders to ensure the project's success.
- Participate in all phases of the software development lifecycle, including requirements definition, design, development, testing, and deployment.
- Implement and maintain a CI/CD pipeline for automated build, test, and deployment processes.
- Troubleshoot and resolve technical issues related to application performance, scalability, and security.
- Analyze high-cost ABAP programs.
- Stay up-to-date with the latest trends and technologies in cloud computing and integrated platforms.
- Contribute to the development of best practices and standards for application development and integration.

Required Skills

- Experience in SAP S/4HANA implementation projects.
- Over 3 years of experience in software development (SAP ABAP).
- Experience in detailed design using SAP.
- Experience developing SAP Fiori screens.
- Excellent communication and collaboration skills.
- High problem-solving and analytical skills.

Desired qualifications:

- SAP S/4HANA Certification.
- Experience in migration projects from ECC to S/4HANA.
- Experience implementing SAP BTP.
- The ability to independently customize SAP FI/SD/MM modules.
- Practical experience in analyzing high-cost SQL statements
