Job Description

Role

Software Engineer / System Engineer / Technical Consultant

Job Description Overview

We are seeking talented software engineers with strong problem-solving skills and a keen interest in financial markets and consulting.

In this role, you will work directly with financial institutions including banks, exchanges, and clearing houses as a technical consultant, helping clients analyze business challenges and design, develop, and implement trading and risk management solutions.

This position offers exposure not only to software engineering, but also to client-facing consulting work such as:

- Business analysis and requirements gathering
- Solution proposal and system design

- Financial system implementation and support
- Risk management and trading workflow optimization
- Communication with international teams and clients
- End-to-end project involvement from consulting to delivery

This is an excellent opportunity for candidates who want to combine technical expertise with consulting and business problem-solving skills in the financial industry.

No prior finance knowledge is required. New graduates and second-career graduates are welcome, and training will be provided.

Salary

5–8 million JPY annually depending on skills and experience.
Additional bonus payment possible.

Work Location

Nihonbashi, Tokyo

About Aurora Solutions

Aurora Solutions is a consulting firm specializing in clearing, risk management, collateral management, and back-office operations for financial institutions.

Our major clients include banks, exchanges, and clearing houses. We provide both technical and consulting services to help clients improve mission-critical financial systems and operations.

We offer an international and collaborative environment where employees can develop both engineering expertise and consulting capabilities.

Required Skills

Skills & Requirements

- Programming skills (Java or similar language)
- English skills sufficient for daily conversation
- Major in Computer Science, Engineering, or related field
- Strong communication and teamwork skills
- Native or business-level Japanese language ability
