May review study specific translations
Supervises Trial Master File （ TMF ） maintenance throughout the study startup phase

Required Skills

College/University degree in Life Sciences or an equivalent combination of education training and experience
2 3 years prior clinical study and site startup experience
Well developed communication and organizational skills
Ability to negotiate and build relationships at all levels
Leadership mentoring and organizational skills
English and Japanese skills （ High Business level to Fluent ）

Company Description

PSI is a leading Contract Research Organization （ CRO ） with over 30 years of experience in the pharmaceutical industry. Originating from Switzerland PSI is a privately owned full service CRO with a global reach supporting clinical trials across multiple countries and continents. Our reputation for being highly selective about the projects we undertake highlights our commitment to delivering high quality timely services across a broad spectrum of therapeutic indications.In an industry where cost cutting and layoffs are common PSI stands out as a stable and secure workplace. Our dedication to stability is evident in our exceptionally high repeat and referral business rate and minimal staff turnover. Many of our colleagues have been with us for over 15 years contributing to our long standing traditions and history. Our expansion into Japan continues this legacy and we seek team members who will grow with us for the long term.At PSI we foster an environment where a diverse range of colleagues feel welcomed and valued. Our inclusive culture is a cornerstone of our success enabling us to attract and retain top talent globally.We are not just about conducting clinical trials; we are about building a community where every team member has the opportunity to thrive and contribute to groundbreaking advancements in the pharmaceutical industry.
