Job Description

We have a new opening for a **Native Japanese Bilingual Project Lead**. Please find the key details below:

Position: Native Japanese Bilingual Project Lead
Experience: 10+ years of software development experience
Work Location: Omiya, Japan
Salary: 10 to 12 M JPY (Negotiable)

Key Skills Required:

- Strong experience in Image Processing
- Proficiency in C#, Python, and C++
- Capable of reviewing source code written in multiple programming languages, including C++, C#, TypeScript, and Python
- Experience in image processing applications is preferred
- Native Japanese with business-level English communication skills (speaking, reading, and writing)

Job Responsibilities

- Work closely with the customer in Japan to understand high-level business requirements and project expectations.
- Analyse, clarify, and document customer requirements in detail.
- Create mock-up screens, requirement specifications, and functional specifications based on customer inputs.
- Review and finalize requirements through discussions with the customer.

- Explain finalized requirements clearly to the offshore development team.
- Act as the bridge between the customer and the development team for requirement clarification and communication.
- Prepare and manage the project schedule, milestones, and delivery plan.
- Track project progress and proactively identify risks, issues, and dependencies.
- Coordinate with the development team to ensure timely completion of planned activities.
- Review development deliverables to ensure alignment with customer requirements.
- Support code review activities and ensure development quality.
- Perform functional verification of the product delivered by the development team.
- Ensure that final deliverables meet customer expectations and quality standards.
- Report project status, risks, issues, and progress updates to relevant stakeholders.
- Work independently with minimal supervision and take ownership of assigned responsibilities.
- Demonstrate strong self-initiative, decision-making ability, and a proactive go-getter attitude.

Required Skills

Qualifications and Technical Requirements

- 10+ years of software development experience.
- Capable of review created source code in different programming languages – C++, C#, Type Script, Python etc.
- Experience in the image processing application is preferred.

Knowledge, Skills, and Abilities

- Japanese Native with business level English communication skills, including speaking, reading, and writing.
- Experience in work with offshore teams.
- Positive attitude and willingness to explore unfamiliar software implementations and troubleshoot issues.
- Strong interpersonal skills and the ability to work effectively as part of a team.
- Flexibility to work in a distributed, collaborative, global environment across time zones.
- Self-motivated, accountable, and responsible.
