Job Description

【Bilingual Junior Infrastructure Engineer - minimum 6 months experiences are required】

Build your infrastructure engineering career with strong training and hands-on experience across diverse projects and

industries. **Work close to home in Osaka, Nagoya, or Tokyo!**

Why should you apply:

- Stable, permanent employment at an established IT infrastructure company with long-term enterprise projects
- Bilingual work environment, using both Japanese and English in daily operations
- Flexible project assignment based on your experience and preferred location
- Inclusive workplace culture with a strong commitment to diversity and support
- Comprehensive compensation and benefits, well suited for early-career professionals

Responsibilities:

Project assignment will be determined **based on your experience, availability, and preferred work location.** You will be involved in bilingual (Japanese & English) IT user support projects.

Example Projects:

- On-site support for IT equipment (PCs and peripheral devices)
- Meeting room equipment support and conference assistance
- Front desk / help desk support, responding to IT-related inquiries from visiting users
- Network infrastructure setup, relocation, replacement, and ongoing operations
- Network setup, maintenance, and management for overseas branch openings and closures
- Firewall configuration and management (e.g., FortiGate)
- System and network monitoring using tools such as Zabbix

Required Skills

- At least 6 months of hands-on experience as an infrastructure or IT engineer
- Business-level Japanese proficiency (JLPT N2 equivalent or higher)
- Business-level English proficiency
- Strong motivation to work in Japan and willingness to continue learning Japanese
