Job Description

A leading technology manufacturing company is looking for an Operations Manager. The selected candidate will oversee production planning, contract manufacturing, supplier management, supply chain continuity, and operational improvement.

A leading technology manufacturing company that helps facilitate the production of semiconductors for a range of industries. Headquartered in the United States, the company provides its services to semiconductor manufacturers across the globe.

Keywords:

インダストリアル, メーカー, 製造業, 機械, エンジニア, 求人, 外資系

Job Ref: JYGCBP

Responsibilities:

- Lead production activities across contract manufacturing partners and manage costs, capacity, engineering resources, and delivery schedules
- Develop production plans and recovery actions for schedule delays, quality concerns, and operational disruptions
- Oversee the full manufacturing cycle, including design coordination, production, testing, evaluation, inspection, and shipment readiness
- Manage supplier relationships, component procurement, material availability, quality performance, and supply chain risk mitigation
- Coordinate with Sales, Engineering, R&D, Data Verification, and EHS teams to resolve issues and meet customer commitments
- Manage inventory, warehouse operations, resource allocation, facility improvements, 5S activities, and future team development

Requirements:

- Experience in Production Management, Manufacturing Operations, Operations Management, or Supply Chain Management within large equipment, machinery, or industrial manufacturing environments
- Prior supplier management and negotiation experience (cost, delivery, quality, and service-related discussions)
- Proven project management experience involving cross-functional stakeholders
- Background in managing costs, budgets, and payment controls
- Prior background in leading teams, coaching employees, and driving organisational performance through effective leadership
- Knowledge of Bill of Materials (BOM) structures and Material Requirements Planning (MRP) systems
- Understanding of logistics, warehousing, inventory control, and supply chain operations
- Ability and willingness to travel
- Business level written and spoken English; proficient in Japanese

Preferred requirements:

- Experience managing production operations for semiconductor manufacturing equipment, factory automation (FA) systems, or other industrial machinery
- Prior experience coordinating activities among engineering teams, contract manufacturers, and external suppliers
- Knowledge of semiconductor industry manufacturing processes and operational requirements

Company Description

For over 25 years, in Japan, we have been a driving force in the Japanese bilingual recruitment market, providing high-quality candidates for our clients and access to the best jobs. We always put the interests of our clients and candidates first and run on a non-commission model that promotes a working culture where teamwork is incentivised. We strive to find the best fit for both employer and job seeker and don't push people into unsuitable roles.
