募集要項

Join a large-scale mobile product team as a UI/UX Engineer, helping shape and enhance a widely used digital payment application. You'll work across product, design, and engineering to deliver intuitive user experiences and drive frontend innovation.

Client Details

Our client is a leading technology-driven organization operating one of the country's largest digital payment platforms. The team is focused on building scalable, user-centric services that support millions of users through modern web and mobile technologies.

Description

- Develop and enhance mobile application features using modern frontend technologies and frameworks.
- Collaborate with cross-functional stakeholders to translate business requirements into effective user experiences.
- Lead technical initiatives and contribute to the delivery of high-quality, scalable frontend solutions.

- Take ownership of product areas, continuously improving usability, performance, and user satisfaction.

Job Offer

- Rare English Based Role
- Work in a well known company
- Free office meals.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

スキル・資格

- Hands-on experience with HTML, CSS, JavaScript, and modern frontend frameworks such as React, Vue.js, Svelte, or Next.js.
- Strong understanding of TypeScript, HTTP protocols, testing practices, version control, and frontend architecture.
- Ability to improve products through data-driven UX methodologies such as A/B testing and user research.
- Proven track record of working independently while collaborating effectively within cross-functional teams.

会社説明

Our client is a leading technology-driven organization operating one of the country's largest digital payment platforms. The team is focused on building scalable, user-centric services that support millions of users through modern web and mobile technologies.
