Job Description

Serve as the primary technical liaison between the customer and global engineering teams for ADAS-related projects.
Support the integration of advanced autonomous driving and vehicle computing technologies into production vehicles.
Gather customer requirements and technical expectations, ensuring alignment with development teams.
Coordinate software releases, testing activities, issue investigations, and technical evaluations.
Reproduce and analyze technical issues, supporting root cause investigations and corrective actions.
Collaborate with global engineering teams to implement software updates and validate improvements.
Provide first-level technical support to customers and coordinate specialized support when required to ensure successful project execution.

Employee Benefits:
Flexible and mobile working arrangements including flex-time
Extensive training and development programs including structured learning, coaching, mentoring, and educational leave
Transportation support including public transport options, bicycle leasing, and parking facilities
Subsidized meals at on-site dining facilities
Support services including social counselling and childcare coordination

Secure bicycle and motorcycle parking facilities

Required Skills

Required
Engineering background with foundational knowledge of software development, hardware development, or both.
Native-level Japanese communication skills.
Business-level English communication skills, including written and verbal communication.
Strong customer-facing communication, negotiation, and relationship-building skills.
Ability to work effectively at customer locations and travel as required by project needs.
Problem-solving mindset and the ability to coordinate across multiple stakeholders and teams.

Preferred
Experience in the automotive industry.
Familiarity with automotive diagnostic and evaluation tools such as CANoe.
Experience using project management and collaboration tools such as JIRA.
Knowledge of automotive electrical and electronic systems.
Experience in development or testing of automotive systems.
Valid driver's license.
Ability to work effectively in multicultural and international environments.
