Role Overview:

We are seeking Japanese–English bilingual clinicians who are licensed and actively practicing in Japan in Internal Medicine or Primary Care. You will contribute to a clinical AI evaluation project by reviewing and annotating Japanese patient histories covering multiple visits, with a focus on Type 2 diabetes.

Responsibilitie

- Review longitudinal patient histories in Japanese and interpret the clinical context across multiple visits.
- Identify and correct localization issues to ensure content is appropriate for clinical practice in Japan.
- Write and rate patient check-in plans across approximately 10 decision points per case.
- Review AI-generated plans for clinical appropriateness, accuracy, and relevance to the patient's history.
- Apply sound clinical reasoning and follow the project's annotation and evaluation guidelines.

Required Skills

Required qualifications:

- Valid medical license in Japan and active clinical practice in Internal Medicine or Primary Care.
- Recent, hands-on experience managing patients with Type 2 diabetes.
- Strong written Japanese and English proficiency, including the ability to interpret clinical documentation and clearly explain clinical judgments.
- Strong clinical reasoning, attention to detail, and the ability to evaluate patient management plans.
- Availability to commit approximately 15 hours per week for 10 weeks.

Project commitment

- Duration: 10 weeks.
- Time commitment: Approximately 15 hours per week.
- Estimated handling time: Approximately two hours per case, including localization corrections, check-in plan creation and rating, and AI-generated plan review.
