募集要項

About the Opportunity

We are looking for an experienced **Network Engineer (CCNP/CCIE)** to support enterprise network infrastructure for global operations. The successful candidate will design, implement, optimize, and maintain secure, highly available network environments across data centers, cloud platforms, and branch offices.

You will collaborate with international teams to deliver reliable network services supporting mission-critical business operations.

Key Responsibilities

- Design, implement, and support enterprise LAN, WAN, WLAN, and data center networks.
- Configure and troubleshoot Cisco routing and switching infrastructure.
- Deploy and manage SD-WAN solutions.

- Support enterprise wireless networks and network security technologies.
- Configure and maintain firewalls, VPNs, and secure remote access solutions.
- Monitor network performance, availability, and capacity planning.
- Perform root cause analysis and resolve complex network incidents.
- Support cloud networking across Azure, AWS, and GCP.
- Implement network automation and Infrastructure as Code solutions.
- Participate in disaster recovery and business continuity planning.
- Maintain technical documentation, diagrams, and standard operating procedures.
- Work with cross-functional infrastructure, security, cloud, and application teams.
- Participate in change management, maintenance windows, and on-call support as required.

Required Qualifications

- Bachelor's degree in Computer Science, Information Technology, Electronics, or a related field.
- 5–15+ years of enterprise networking experience.
- CCNP Enterprise certification (required).
- CCIE Enterprise Infrastructure (preferred).
- Experience supporting large-scale enterprise or managed services environments.

スキル・資格
