会社概要

For 30 years, Oracle has remained the gold standard for database technology and applications in enterprises throughout the world: The company is the world ' s leading supplier of software for information management, and the world ' s second largest independent software company. Oracle technology can be found in nearly every industry, and in the data centers of 98 of the Fortune 100 companies. Oracle is the first software company to develop and deploy 100 percent internet-enabled enterprise software across its entire product line: database, business applications, and application development and decision support tools.

What ' s in store for tomorrow? We will strive to become No. 1 in middleware and No. 1 in applications, just as we ' ve done in database. Our goal is to continue to innovate and to lead the industry?while always making sure that we ' re focused on solving the problems of the customers who rely on our software.
