募集要項

***** An Exciting Opportunity for Freelancers [OR] those who Aim to Land a Perm Full Time Position!! *****

*** Initial 3-month contract (full-time or 4 days/week) with a strong likelihood of extension and potential transition to a permanent role based on performance and mutual interest. ***

Role Overview

A delivery focused opportunity for experienced UX Designer/Engineers to join an product squad within a fast-paced travel/hospitality tech company. In this role, you will leverage modern AI-assisted tools to rapidly convert complex business requirements into high-fidelity, build-ready digital experiences under deadline-driven agile cycles.

[RESPONSIBILITIES]

Agile Product Design & Handoff

- Transform requirement briefs into intuitive user flows, interactive wireframes, and production-ready interfaces while maintaining active alignment with engineering teams during sprints

AI-Accelerated Prototyping:

- Utilize cutting-edge AI design workflows, coding assistants, and automated tools to generate multi-concept prototypes and draft research variants in hours rather than weeks.

Squad Collaboration & Alignment:

- Partner daily with Product Managers and developers in sprint reviews, QA validations, and UI iterations to resolve delivery trade-offs proactively.

Design System Stewardship:

- Contribute to and expand internal component libraries and design variables to maintain product-wide visual consistency.

[POSITION HIGH LIGHTS]

- An opportunity to work at the forefront of AI-driven product design, creating autonomous, outcome-focused software experiences rather than traditional static SaaS tools!
- You can directly influence shipped products for large-scale enterprise clients across the Asia-Pacific region!!

スキル・資格

EXPERIENCE:

- 5 or more years of hands-on product UX/UI design experience for SaaS or consumer platforms --> successful applicants are expected to submit a strong portfolio
- Solid practical experience in integrating AI tools within your active design and prototyping workflow.
- Expertise in Figma design and prototyping
- Experience with design-to-code tools, code-assisted prototyping, or developer handoff environments.
- Proven ability to work independently, manage tight deadline pressures, and collaborate in agile team environments.

NICE-to-HAVE:

- Experience designing UI and AI agentic products
- Prior UI/UX experience in travel, booking systems, e-commerce, or hospitality domains
- Familiarity with multi-language/multi-market design considerations (APAC).
- Japanese language proficiency.
