現在のビザ
日本での就労許可が必要です

募集要項

About the Company

Leading Mobility Tech Company in Japan providing service across all 47 prefectures with over 40 million downloads, they offer multiple services like decarbonization, autonomous driving, and logistics.

As an Android Developer, you would be working on the **in-vehicle Android applications** that run directly inside taxi hardware, forming the critical backbone for their main service.

Beyond this, you would also actively shape New Development related to **autonomous taxi implementation** as a foundational growth member. Tackling the unique challenges of autonomous mobility during this early stage is one of the most exciting aspects of this role.

What would you be doing?

You would lead the development of Android applications running on hardware units inside taxi vehicles. In addition to application-layer features, these devices involve unique IoT techniques such as hardware integration via Bluetooth/serial communications, real-time location tracking, and MQTT protocol usage.

Tech Environment

- **Language:** Kotlin
- **Libraries & Frameworks:** Android Jetpack, Kotlin Coroutines, Firebase, AWS, etc.
- **CI/CD:** CircleCI, Bitrise, GitHub Actions

What is great about this company?

- **Strong Engineering Culture:** They support continuous growth (book purchasing stipends, conference sponsorship, internal study sessions, etc.) as well as Engineer Challenge Week, where the whole company pauses work to focuse on learning new skills.
- **Work-Life Balance:** Including Full Remote in Japan, they enjoy highly flexible culture with many working parents, remote work from regional locations across Japan, and dedicated team communication routines (e.g., casual syncs, day-trip workations).
- **Comprehensive Onboarding:** about company structure, business models, and team dynamics, direct Q&A sessions with department heads, hands-on field engineering sessions with actual vehicle hardware, informal sessions with executive leadership, and customer support shadowing.
- **Full Social Insurance:** including Health, Employee Pension, Employment Insurance, Industrial Accident Compensation.
- **Company Allowances:** including Trial Taxi Allowance (10,000/month JPY), New Normal Allowance (JPY 10,000/month), and Child Allowance **(**5,000/month JPY per child).

スキル・資格

What experience are we looking for?

- 4+ Years Hands-on experience developing Android applications using **Android Architecture Components**.
- Experience implementing asynchronous processing using **Kotlin Coroutines**.
- Experience leading software development initiatives.
- Business-level Japanese for internal communication, plus Conversational English preferred.
