募集要項

■This role is intended for UNIOR to STAFF Level Full Stack Developers : 4.0M to 6.0M yen annual

■For more experienced applicants, **there is a room for more experienced developer(s)** if the team finds applicants suitable**.** Please check with us for more details.

■This role is **NOT** intended for those who are looking for fully work-from-home opportunities.

.....

A globally operating tech company is expanding its team in Japan, and is actively hiring full stack developers! Successful applicants will be assigned to projects or products based on their tech or industry expertise.

[EXAMPLES of RESPONSIBILITIES/ PROJECTS]

1) Bilingual Team Collaboration:

Communicate technical plans, document workflows, and align priorities with

cross-functional team members and stakeholders in both Japanese and English.

2) Full Stack Application Delivery:

Architect, build, and maintain scalable web applications and intuitive interfaces

across frontend and backend tiers with clean, modular, and well-tested code.

3) Data & API Development:

Design robust database schemas, build high-performance APIs, and integrate

third-party webhooks and services.

4) Cloud Operations & Delivery:

Configure CI/CD automated deployment pipelines, run applications in containerized

cloud environments (AWS/Azure/GCP), and set up basic telemetry and alerts.

5) AI Tooling Adoption:

Incorporate AI coding assistants into daily workflows and evaluate practical

LLM-powered features to enhance user applications.

[WHY YOU SHOULD APPLY?]

If you are not sure, please contact us for more information! This will be a great opportunity for your to establish your career and expertise!!

***End-to-End Ownership:** You will be given an opportunity to take full ownership of features across the entire lifecycle, from discovery, architecture, and coding to cloud deployment, monitoring, and post-mortems!

***Modern, AI-Accelerated Culture:** You will work in a forward-thinking environment that actively champions modern AI-assisted engineering tools (Copilot, Cursor, LLM APIs) to eliminate repetitive toil and boost productivity.

***Global & Cross-Functional Collaboration:** You can leverage your bilingual capabilities daily, bridging global delivery networks with major domestic clients driving mission-critical digital transformations

Tech Stack/Environment: PostgreSQL, MySQL, MongoDB, GraphQL, Go, Python, Docker, Vue.js, Node.js, Next.js, REST API, React, CI/CD Tools, AWS, Azure, GCP, Kubernetes, Ruby, Java, Copilot
