募集要項

Job Title: Solution Architect

Location: New Delhi

• Clarify customer and product-team requirements and define solution architecture
• Design application, cloud, data, AI, and integration architecture
• Design UI components, SDKs, libraries, APIs, and their integration patterns
• Design PoCs for new products and features
• Define performance, security, scalability, maintainability, and other non-functional requirements
• Select technologies and establish design standards
• Coordinate technical decisions between Japan headquarters and the India development team
• Lead technical collaboration with external development partners
• Conduct architecture reviews and guide engineering teams on code quality and design
