Company Description:

About T-Systems Japan

T-Systems Japan is a subsidiary of T-Systems Enterprise Services GmbH (Frankfurt, Germany) providing ICT (Information and Communication Technology) solutions to internationally active corporate customers. T-Systems Japan offers various domestic and global network services including an international MPLS network and Global Internet connection, by utilizing Deutsche Telekom 's Telekom Global Net.

In the field of IT Services, T-Systems Japan offers services such as SAP Application Outsourcing, User Help Desk Services, Data Center Services and Managed Desktop Services. T-Systems Japan also offers a broad portfolio of solutions in the field of PLM (Product Life Cycle Management) for the Automotive industry. For international carriers and service providers, T-Systems Japan offers carrier solutions as well as operator outsourcing solutions.
