

Company Description

InfoEx Corporation

InfoEx ' s wide range of service lineup is based on its broad network with business partners. In the IT solution area, we seamlessly collaborate with "Logica", a globally renowned solution provider, BeMap Group, a coherent service provider from system planning and development to website creation, and Japanese major system integrators. By leveraging this partnership, cross-functional project team is organized to tackle with client ' s unique management issues with creative and flexible manner.

Regarding the cross-boarder business expansion support, by considering the project objective and scope, we can organize a professional team consists of strategic management consultants, CPAs, lawyers, patent agent, tax accountants, interpreters, translators and any necessary experts who presently work individually but had abundant experiences at big firms and then became independent. Our service is distinguished with its agility, flexibility and high-quality while reasonably priced.

The skills vital to businesspeople, or to engineers for that matter, have nothing to do with nationality, age, or gender. Over the course of various projects, we have worked alongside professionals from the U.S., Great Britain, India, South Korea, China, the Philippines, and many other countries, and have consistently been impressed by the exceptional abilities these men and women possess. Along with their high degree of skill and wealth of experience, these warm and affable people also boast the proficiency in Japanese necessary to conduct business.

At InfoEx, we make full use of our wide-ranging network spanning North America, Europe, and Asia to refer and place global human resources capable of flexibly addressing client needs. In addition to recruitment within Japan, the support we offer extends to local human resource recruitment for overseas business offices, as well as to the recruitment of overseas human resources for employment in Japan.
