

DSS Software Solutions Sdn. Bhd.

会社説明

We are a customer focused IT Software solutions & Managed services provider, established in 1997 and managed by professionals with rich experience of IT background and industry exposure. We offer services in Software Application Development, Website Design, Mobile application development, E-Commerce solutions (OsCommerce, ZenCart, etc), Portals, CMS (Joomla, Drupal, etc), WordPress, Datawarehousing/BI applications, Desktop applications, Web Applications, ERP system, Wireless applications (.NET, J2ME, Symbian, BREW platforms), Testing Services, Autocad Drafting, BPO Services and Web Hosting.

DSS brings together the best people, processes, and technologies to provide high-quality and cost-effective end-to-end solutions for all your Information Technology (IT) business needs. DSS has always defined itself as being a solutions-oriented company, whereby it was not wedded to any particular brands or vendors solutions.

Our development teams continually push the boundaries of existing technologies while identifying entirely new categories of solutions and alternative ways to deliver these solutions to our customers. Similarly, our research teams are on the alert for new technology trends that can catapult a company's capacity to master its future. We have broad range of highly skilled professionals which help us to offer technology services to address client needs for both short and long-term assignments.

DSS has a reputation in the IT services industry for quality, reliability, and cost-effectiveness. The industries in which we have served clients include the Banking and Financial Services sector, Healthcare, Transportation, Real Estate, Manufacturing, Retail, and Telecommunications. DSS also provides customized IT solutions for all levels of Small and Medium Enterprises (SME), government agencies, and not-for-profit organizations.

We take great pride in our ability to craft and deliver winning solutions for our clients, often under demanding circumstances. We offer competitive pricing, rapid response and exceptional quality of service for your challenging information technology initiatives.
