NinjaOne

会社説明

Everything is an endpoint — from phones to servers to point-of-sale devices — and 52% of employees use three or more devices to work at home, in the office, and elsewhere every day. And they all must work without compromising security or efficiency. Meanwhile, IT teams are being asked to do more with fewer people and tighter budgets. Teams need solutions that unify IT operations, prevent issues before they impact employees, and deliver a better technology experience with more effective support, less downtime, and fewer interruptions. That’s where NinjaOne comes in.
