

Osaka YMCA International School

Osaka YMCA International School

Company Description

At OYIS, we provide a high-quality, international education to students from around the world.

Our school is built around the concept of community. We are committed to empowering students so they can make a meaningful difference in society.

We achieve this by following the **International Baccalaureate's (IB) programmes**, using real-life global issues to equip students with essential skills and knowledge.

Through our teaching and learning, we help students discover who they are and connect them to an inquiry-based learning environment. By encouraging student curiosity about the real world, we are then able to make connections with our community through service learning.

OYIS is proud to be the only IB continuum school in Osaka City, teaching more than 300 students comprising 34 nationalities. We offer the IB's Primary Years Programme (PYP), Middle Years Programme (MYP) and Diploma Programme (DP). This means we can provide students with the perfect pathway from preschool through to Grade 12.

Although OYIS has grown rapidly in the past few years, we have retained our sense of community and remain a family-orientated school. We are an inclusive school that looks to support all the various needs of all students so they can reach their full potential.

OYIS is a fun, aspirational, and caring community. We would be honoured to share this experience with you.
