

Daito Co., Ltd.

## Company Description

Our motto to be "the company that strives to help create pleasant lives" has motivated us since the founding of our organization, and upon this philosophy we have grown our business, developing many different products to meet the needs of the people over the changing times.

We aim to bring "Comfort, convenience, warmth, safety, and quality" to our customers, delivering what we value to you and your family, to companies, to cities, and to the world.

We will make our Daito dream, to connect hearts, into reality.

### Daito's business operations

#### Amenities Operations

We offer a variety of amenity products, all of which we can proudly say are safe, high-quality, and functional. We manufacture our products at our own, domestically located factory from beginning to end, including the manufacturing of original packaging and distribution.

#### Labor-Saving Solution Business

We develop money counters, small general-purpose machines, manual vending machines, and other items that would contribute to the efficient running and labor-saving of your company or shop. We can suggest original products tailored to your needs and demands.

#### Vending machine Operating service

We give suggestions and ideas for creating relaxing break areas with vending machines. We offer a wide range of products from collaborating domestic leading manufacturers in the country. We can provide complete operation services, from re-stocking products to maintenance of the machines.

#### Consumer Products Operation

We develop safe and reliable original personal hygiene products such as oral care products, cosmetics, and health foods, for general consumers, collaborating with domestic and overseas companies.
