

Toluna Japan

Company Description

Start Knowing

Innovative technology. Human expertise. Real-time consumer intelligence.

Toluna is a technology company that delivers real-time insights at the speed of the on-demand economy. We do what no other insights company can. We combine innovative technology, award-winning research design, vertical expertise and a panel of over 40+ million consumers.

What does this mean for you? It means you can get more research done in less time with less budget. It means you can design a research program that meets your needs, whether that's self-service or full consultancy. It means you can trust your insights because quality is baked into every part of our process. And it means you can do it at scale.
