Garmin Ltd.

Company Description

Company Profile – Garmin

Garmin is a global technology company founded in the United States in 1989. Built on GPS technology, the company develops and delivers innovative products and solutions across five key business segments: Fitness, Outdoor, Aviation, Marine, and Automotive OEM.

Garmin offers a wide range of products, including smartwatches, cycling computers, aviation navigation systems, marine electronics, and automotive solutions. By leveraging highly accurate positioning technology and advanced engineering, Garmin supports a broad spectrum of activities, from everyday life and sports to specialized industrial applications, enhancing people's performance, safety, and convenience.

One of Garmin's key strengths is its vertically integrated business model, which encompasses research and development, product design, manufacturing, sales, distribution, and after-sales services. With development and manufacturing facilities around the world, Garmin maintains high standards of product quality and reliability while responding swiftly to evolving market needs.

Through continuous research, development, and technological innovation, Garmin actively pursues the creation of new products and market opportunities. As a publicly listed company on the New York Stock Exchange (NYSE: GRMN), Garmin continues to grow as a global leader, earning strong recognition and trust from customers worldwide.

Garmin Japan K.K. serves as the Japanese subsidiary of Garmin, responsible for domestic sales, marketing, customer relations, and other business operations in the Japanese market.
