日揮ユニバーサル株式会社

Nikki Universal Co., Ltd.

Company Description

Nikki-Universal has officially defined its purpose -its reason for existence-. It has been created around the keyword "媒【NAKADACHI】" (= intermediary, link or bond), and released together with the slogan "Be a Catalyst!". This purpose embodies our determination to act as catalysts ourselves and to contribute to transforming the world.

As a joint venture between UOP LLC (United States) and JGC Holdings Corporation (Japan), our company has been at the forefront of providing innovative solutions through technology licensing and catalysts in the petroleum refining and petrochemical industries in Japan. Additionally, we have independently developed environmental purification catalysts, pioneering efforts to address environmental challenges as the front-runner in the industry. Since our founding in 1963, we have continuously leveraged our extensive expertise and achievements accumulated over our long history to explore the limitless potential of catalysts.

Furthermore, in pursuit of achieving carbon neutrality by 2050, we actively participate in decarbonization-related projects and advance technological developments in new energy sectors, such as hydrogen, ammonia, and next-generation biofuels. Through these initiatives, we are committed to creating new businesses to always innovate and work towards a better future for the next generations.

Today, the world faces numerous challenges, including the transition to a carbon-neutral society. Addressing these issues requires a long-term perspective that considers social demands such as contributions to the Sustainable Development Goals (SDGs) and to the Environmental, Social, and Governance (ESG) criteria. Going forward, we will continue to, as a team, put efforts to catalyze reactions not only between substances, but also between people and organizations. We are willing to be relied upon globally and are committed to contribute to the transition towards a more sustainable future.

Company Details

Head Office
Japan

Main Business
石油精製・石油化学に関する各種UOPプロセスのライセンシングならびにプロセス触媒の製造販売、 および環境浄化用触媒の製造販売

Capital
10億円

Number of Employees
101 - 500
