

Nishimachi International School

Company Description

Philosophy

Nishimachi believes that education should promote the well-rounded development of individuals through the cultivation of their intellectual, creative, personal, social, and physical abilities. The school is committed to educating both Japanese and foreign students to be international and independent thinkers. We believe that learning a second language provides the opportunity to grow beyond a single culture. We believe that classroom and co-curricular activities should foster sensitivity to, and respect for, individual talents as well as differences. We believe that every student must learn to function both as an individual and as part of a group. Our ultimate goal is that every Nishimachi student learn to live harmoniously in, and contribute to, world society.

Student Learning Expectations:

A Nishimachi education is about much more than academic programs or subject offerings. What makes Nishimachi special is community and our culture of respect, understanding of diversity, focus on active learning, trust, and communication, and strong commitment to language learning, in both English and Japanese. We aim to develop in every student an awareness of, and appreciation for, all cultures. Six school-wide student learning expectations are at the center of our daily work: at Nishimachi students learn to be good communicators, collaborators, thinkers, responsible learners, developers of quality work, and global ambassadors.
