

Recycle Point Tokyo KK

Company Description

Rediscover. Renew. Reuse

Our journey began with a mission to contribute to the global efforts to decrease the swelling adverse environmental consequences arising from e-waste. We do this by optimising and extending the product lifespan of used electronics and to bridge the digital and economic divide by re-selling them to developing markets.

Since our establishment, we have grown from strength to strength. Our annual revenue growth has increased substantially and we have expanded our operations internationally to Tokyo, Dubai, GuangZhou, ShenZhen and more recently, Hong Kong.

At present, we serve the Middle East, China, Hong Kong and South East Asia region markets. Furthermore, we are expanding our product range from pre-owned Game Consoles/Portables/Accessories to pre-owned Smartphones/Tablets, pre-owned Medical Equipment as well as Industrial Products.
