ISA Inc.

Company Description

Our mission is to encourage future generations to contribute to schools, families, and local communities through international education.
We cherish children's infinite potential and we are willing to foster self-sufficient people with a future vision coupled with competence in a global society.
We will endeavor to continue developing as innovators of international education.

< Programs and Services >
Each program is designed to interact with the other, while developing student English skills, leadership skills, and fostering a knowledge and outlook suitable for active participation in the modern global community.

- **Short-Term Study Abroad Programs**

These programs are customized for elementary to post-secondary students. They are targeted towards developing English communication skills, a global mindset, leadership skills, and a vision for the future. Our programs are taken place in collaboration with schools and local communities.

- **Long-Term Study Abroad Programs**

Working closely with JFIE, a non-profit organization, ISA offers high school students a variety of study abroad programs, including a 10-month high school exchange program. ISA also develops and offers programs that specialize in academic purposes.

- **Guidance and Counseling to Attend Overseas University and College**

ISA launched a consulting business that provides guidance and counseling for Japanese high school students interested in attending university and college in the US, Canada, Australia, and New Zealand. These services include organizing workshops for students and parents to help them in their application process.

- **Intensive English Programs in Japan**

ISA plans and organizes various domestic intensive English programs with experienced non-Japanese English teachers. The programs are held both in school and outside of school targeted towards elementary, junior high and high school Japanese students. These programs place emphasis on improving English communication skills, fostering self-confidence and enhancing student interest in global society.

In 2016, ISA implemented about 300 programs to more than 20,000 young Japanese students.

- **Global Education Innovation Support for Educational Institutions**

As a partner of a wide range of educational institutions, we offer consulting services for planning innovative and sustainable education systems. ISA also offers school management strategies essential for the improvement of global education.
