

Genetec Japan KK

Company Description

Innovation is at the core of what we do

When we started out in 1997, we knew that technology could break down barriers and broaden perspectives. Our very first IP-based video surveillance system was true to that belief. It gave customers more flexibility, scalability, and ease of use. It empowered our users to do more.

Life is better when things go smoothly

Today, we're still focused on delivering innovation that makes life work better. As the industry leader in IP-based security solutions, it's our aim to minimize the unknown. We build resilient, connected solutions that help businesses protect, understand, and enhance the world around them. Our solutions go beyond security. They provide operational insights that allow people to improve their business and master their environment.
