

DuPont Japan K.K.

Company Description

We make essential innovations the world needs now.

From protective, to delivering clean water and enabling smarter, faster electronics, see how we use science and innovation to make so many of the things you use every day possible:

What our innovations enable today

- **Connectivity and mobility**

Our technologies can be found in the majority of the world's smart devices, and provide crucial components for smart cities and autonomous vehicles.

- **Healthy and Active Lifestyles**

In addition to helping provide clean water to communities, we also focus on improved biopharmaceutical processing and delivery, and health and fitness monitoring.

- **Urbanization and safety**

We develop protective fabrics, infection, and disease protection, and thermal and electrical protection for workforces around the globe.

Together, we're transforming industries and improving everyday life.

After more than 200 years of innovation, DuPont is entering a new era of discovery.

Our community of scientists, engineers, visionaries and all of our partners are working every day to turn possibilities into real world answers that help humanity thrive.

Our businesses

- **Electronics&Industrial**

We're pursuing new technologies and performance materials that enable your designs to be smaller, more complex, more reliable, and more powerful than you could ever imagine.

- **Mobility & Materials**

We deliver a broad range of technology-based products and solutions to the automotive, electronics, industrial, consumer, medical, photovoltaic and telecom markets.

- **Water & Protection**

Our purpose is clear, we create water, shelter and safety solutions for a more sustainable world.
