

DuPont Japan K.K.

Company Description

The Most Dynamic Science Company in the World

There are many urgent challenges that need to be addressed today to contribute to societal development, such as the rapid increase in the world's population and securing the energy used in daily life.

DuPont has been a science company that has supported people's lives and industrial activities for over 210 years, leveraging the power of science. With world-leading technological prowess, it offers materials and technologies across a wide range of fields, including transportation-related equipment such as automobiles, electronics materials, telecommunications, housing and construction, agriculture, safety and protection, and apparel.

Tradition and Innovation at DuPont: Our Corporate Mission is "Sustainable Growth" Founded in 1802 as a black powder manufacturing company in Wilmington, Delaware, USA, DuPont has produced numerous innovative technologies that contribute to people's lives and industrial activities, evolving into a global company dealing in chemicals and energy.

Currently, as a science company that continues to provide innovations, DuPont aims for sustainable growth while considering the reduction of environmental impact, providing value to shareholders and society based on its core values that have remained central since its founding over 210 years ago.
