

Rigol

Company Description

At RIGOL Technologies CO., LTD., we bring together exceptional talent with innovative potential and visionary insights to lay the foundation for a smarter world through test and measurement.

We provide advanced testing solutions to customers in over 90 countries and regions around the globe, helping them reduce testing and measurement costs, accelerate design and project completion, and quickly deploy new products and technologies. Our engineers offer measurement support to engineers worldwide, creating more possibilities for their explorations.

We firmly believe that innovation is the source of progress. As of June 2025, the company has had 539 authorized patents, including 441 invention patents. The company was listed on the Top 500 Chinese Patent List for three consecutive sessions from 2019 to 2022 and won the "24th China Patent Gold Award".
