

Datawords Japan Co., Ltd.

Company Description

Since its founding in 2000, Datawords Group has been a leader in multicultural and multilingual digital communication, headquartered in France.

We support the global expansion of diverse international brands through a wide range of services, including localization technology, global Web/SNS marketing, and multilingual consulting provided by language specialists from around the world. Today, the group has evolved into a global organization with over 900 employees across numerous offices worldwide.

Datawords Japan was established in 2013 as our Japanese hub to address the local market. Leveraging the group's strength in borderless communication—such as multi-country website launches, multilingual e-commerce, advertising, and SNS management—Datawords Japan supports world-class brands. By combining the group's global scale with the meticulous service quality unique to Japan, we empower our clients to succeed in the global business arena.
