

INBOUND TECHNOLOGY,INC

Company Description

"Create infrastructure services that are essential for foreigners."

Mission:

We are developing a platform business that provides all the infrastructure necessary for foreigners, including housing, investment, credit card issuance, mobile phone issuance and SIM acquisition. Create an environment where everyone, regardless of nationality, gender or age, is proud of their work, cares for their family and is happy with all employees working on inbound technology.

Business Description:

Our company provides various infrastructure services for foreigners mainly in the "human resource introduction industry" and the "real estate industry," and develops platform projects for "VISA management system," "solution development," and "hotel and private lodging."
