

Aspire Lifestyles Japan

Company Description

Aspire Lifestyles has been providing award-winning Concierge service for nearly 30 years and pioneered the industry as it is known today.

Initially developed as an loyalty services offering within International SOS, the world's leading medical and security risk services company, the business continued to grow into a dedicated offering and standalone business that was rebranded "Aspire Lifestyles" in 2013. In response to market demand for global capabilities, Aspire Lifestyles expanded its reach with launches in Japan, Mexico, and Turkey in the past five years.

Today, Aspire Lifestyles employs more than 1,500 people globally, across our 25 centers in 21 countries around the world. We have the largest directly owned-and-managed Concierge and loyalty solutions footprint in the world.
