

ARK CONSULTING

Company Description

This consulting firm was founded in 2019 by individuals who had previously worked at general consulting firms and IT consulting firms. Its main business is consulting services centred on the implementation of SAP packages.

In 2023, just five years after its founding, the company was selected as an 'SAP Sell Partner,' a designation held by only about 30 companies in Japan at the time, primarily large consulting firms, and obtained the right to sell and provide SAP solutions as a prime vendor.

Going forward, the company will focus more on prime projects and aim for further expansion and growth.

【Message】 Who are you using your 'excellence' for?

There are many so-called consulting firms in the world.

Working for a major consulting firm and dealing with major clients is a valuable experience. However, it is also true that within a large company, your role becomes limited, and it can be difficult to feel that you are contributing directly to the client.

At ARK Consulting, there are consultants who want to work with mid-sized clients where they can see the faces of those they serve, exercise their own discretion, and feel the tangible impact of their contributions. Why not put your excellence to full use with clients you can see and connect with?

【Management Plan】 Revenue of 4.2 billion yen by 2030!

Since our founding, we have steadily grown our performance and achieved the revenue targets we set at the time of our establishment. Going forward, we aim to accelerate our growth further, with the goal of achieving revenue of 4.2 billion yen by 2030, transforming the company into a holding company, and establishing revenue across multiple business domains.
