

Inductotherm Group Japan Ltd.

Company Description

Company Name: Inductotherm Group Japan Ltd.

Inductotherm Group is a global enterprise specializing in induction melting and induction heating, with 40 locations in 19 countries worldwide. Originally established as Induct Japan Co., Ltd. in 1982, the company was renamed Inductotherm Group Japan Ltd. in 2019.

●About Our Business

You may not be familiar with electromagnetic induction heating equipment.

Electromagnetic induction heating refers to factory equipment that uses electricity to heat or melt metals.

This technology is widely used across various industries that manufacture metal components, such as engines for automobiles, ships, and aircraft, playing a vital role in supporting our daily lives.

●Our Unique Features

With proprietary technology, we handle everything from the design and manufacturing of equipment to after-sales support, ensuring a seamless process. We operate globally and are the only specialized manufacturer offering standardized electromagnetic induction equipment worldwide. Our company holds the top market share in the United States and Europe.
