

SINOMAG JAPAN.Co.,LTD.

Company Description

Founded in 1998 with a registered capital of 70.67 million yuan and a total asset of nearly 1 billion yuan. It is mainly engaged in the development, production and sales of permanent magnet ferrite products. With an annual output of 30,000 tons of permanent magnet ferrite tiles and 40 million commutators, it has 6 production bases and 5 sales centers worldwide.

The high-performance permanent magnet ferrite wet-pressure magnetic tile produced by Long Magnetic Technology is the core component of DC motors, which is widely used in various parts and accessories of automobile drives, electrification systems and car bodies, such as starter motors, ABS motors, wiper motors, shakers Window motors, etc. Facilitate the innovation and development of new technologies such as automobile power, environmental protection, intelligence, safety and comfort. With the application and popularization of frequency conversion technology, high-performance permanent ferrite wet-pressed magnetic tiles have also played an irreplaceable role in the industrial upgrading of the household appliance industry.

The company has passed IS09001, QS9000 and IATF16949 quality system certification. After years of hard work, the "Dragon Magnet" brand has been widely recognized in domestic and foreign markets, and the company has become a mainstream supplier for many well-known motor manufacturers in the world.

The company is a national high-tech enterprise, focusing on technological innovation. At present, it has registered more than 160 national patents, has completely independent intellectual property rights, and covers the main production technology links of high-performance permanent ferrite.

The company pursues high-quality, standardized and consistent production concepts, strives hard, creates value, serves customers and contributes to society.
