

SEMILAB JAPAN K.K.

Company Description

For All Your Metrology Needs

We design, produce and sell metrology equipment for the characterization of semiconductor and photovoltaic materials, for monitoring the manufacturing process of semiconductor devices, flat panel displays and solar cells, and also for R&D purposes in these areas. We offer a variety of measurement techniques; most of them are non-contact and non-destructive. Many of our technologies can be flexibly integrated into different platforms, ranging from simple handheld devices and table-top systems with high resolution mapping capability to fully automated stand-alone production control tools for mid-range and high-level fablines. We also offer in-line measurements for solar cell production lines.

Our strategy is to continuously improve our products, and to offer flexible solutions for our customers' needs with high-value products for a reasonable price. To accomplish this, we employ 850 people worldwide, including 110 physicists and 90 engineers. We are happy to work together with our customers and partners to find suitable solutions for new challenges, and we also participate in various international R&D projects.

We carry out our work in a responsible way; we provide various benefits to our employees and support important cases such as scientific education.

Company Details

Head Office

Japan

Main Business

半導体測定装置、太陽電池評価装置の販売及び技術サービス

President

田平 博志

Established

1987年5月12日

Capital

10,000,000円

Number of Employees

11 - 50

URL
