

Schrödinger K.K.

Company Description

Schrödinger is on the cutting edge of computer-aided drug discovery and materials science, collaborating with companies like Takeda, Ono, Bayer, and AstraZeneca.

We set the record for the largest and fastest cloud computing run, and our software suites continue to revolutionize the design of therapeutics and materials. FEP +, WaterMap, Maestro, and LiveDesign are just a few examples of the programs we've created.

It is our mission to improve human health and quality of life by transforming the way therapeutics and materials are discovered.

We're a diverse global team, dedicated to scientific inquiry and problem-solving. We work hard for our users, our partners, our colleagues, and above all, for patients in need.

We understand that it's people that make a company great. Because of this, we're prepared to offer a competitive salary, bonus plan, and benefits, which includes mutual-aid retirement plans, over three weeks of paid vacation time, numerous company holidays, a parental leave program, and healthcare through our partnership with the Japanese Health Insurance Association.
