SHIZEN ENERGY GROUP

Shizen Energy Group

Company Description

*** We take action for the blue planet ***
Find out more about our Purpose: https://www.youtube.com/watch?v=ihXYVjiX5dw

Shizen Energy Group is a top and rapidly expanding renewable energy developer headquartered in Japan, backed up by government and private funding, and a member of J-Startup, a global startup support program operated by Japan's Ministry of Economy, Trade and Industry.

We create, operate, and manage solar, wind, and small hydroelectric power plants in Asia and South America and are actively expanding our EnergyTech activities, utilising the latest technologies in developing our unique energy management system, with the aim of making renewable energy within easy reach for everyone. In addition to that, we assist with planning and development of renewable energy power plants, actively undertake EPC activities, and work with procurement, financial arrangement and asset management. With the help of our colleagues and partners in Japan and around the world, we take action for the blue planet.

Since its creation in 2011, Shizen Energy Group has always been proud to offer outstanding career development opportunities in a highly diverse environment with a strong startup culture. Members of our crew hail from over 20 countries, and we all meet together once a year to celebrate our growth. We are proud to be creating a global network of local businesses, and would love to see even more people join us on our voyage!
