

## JP Tokyo & Co.

### Company Description

We are a Japan x India hybrid IT consulting firm established in October 2016 by people from foreign consulting firms and major IT companies.

Our strength is our ability to bring together Japanese consultants with extensive project experience and talented Indian developers to lead projects to success

More than 90% of our business is consulting business and associated system development business for major Japanese companies. Because we are a small company, we are able to execute projects in accordance with our clients' requirements.

Here is an example of a project in 2021.
