Riccardo Tossani Architecture Incorporated

Company Description

Riccardo Tossani, Architecture (RTA) is a multi-disciplinary, creative design studio that breaks down the distinctions between traditional disciplines.

"Each design challenge is a unique opportunity for invention and expression, integration of artistic imperatives and pragmatic needs, and for the critical reexamination of cultural norms."

Architecture is advanced through the integration of all aspects of design, addressing planning, buildings, interiors furniture and landscape. Our capabilities ensure that these are tightly woven into an architecture that becomes part of the cultural landscape.

RTA is based in Tokyo with satellite and representative offices in Los Angeles, Beijing and Niseko.

Highly proficient European, American and Japanese trained architects and interior designers, licensed to practice on several continents ensure an architectural approach based on broad international experience.

Project capabilities include hotel/resort, all types of residential, corporate/office, interior design, programming and master planning. The studio also has considerable experience in product, furniture, graphic design and sculpture.
