SAN-M PACKAGE CO.,LTD.

Company Description

Challenging the frontier of non-woven material to create innobative products.

San-M Package is the world's largest mask manufacturing facility.
Always at the frontier in research and development as a non-woven fabric manufacturer, our fabrics are utilized in medicine, industry and in the home. We began creating processes to unleash the potential of this material back in 1968, when it was still quite new. Later, we became the first in the world to introduce ultrasonic welding, developing original patching machinery.We have continued to develop leading-edge processes to improve our products.These efforts are the reason we are known as a pioneer in the field of non-woven fabrics. Our continuous quest for high quality makes us a world-leading non-woven fabric disposable mask manufacturer. We are advancing into an age of new challenges and new frontiers. Even as we move ahead, we shall continue to look at the world through our customer’s eyes and remain firmly devoted to our goal of developing ever-better, made-to-order products

Catalog

- **Face Mask**

Mask Features.
We produce a wide range of mask features responding to requests from customers, e.g.;
– Protection of eyes from contact with patient body fluids during operations or medical treatment.
– Preventing glass lenses from fogging when exhaling, and light reflection hindering vision.
– Masks that protect from mycobacterium tuberculosis or bird flu
– Masks that prevent from inhaling extermely fine particles such us PM2.5.
– Masks that do not touch your mouth etc.
Furthermore, we have also designed and developed Masks correspomnding to other international standards, such as EN, European Standard and ASTM, American Standard.
San-M Package masks are multi-functional to the needs of our customers. By combining improved filtration efficiency to further block out bacteria with a fully automated production line we are now able to produce high quality masks that protect the wearer from bacteria, fine particles and odor.

- **Respirators**

New Level Raspirator
High ranked masks that are aqquired N95 respirator certification from NIOSH, the US National Institute for Occupational Safety and Health, and FFP Masks are also designed and developed correspong to En, European Standard. We have designed the unique shaped masks that are able to create a clean controlled environment free from particles.

- **Caps**

Made According to Customer Requirements.
There are both numerous uses and requirements for caps. San-M Package selects materials and suggests different styles according to customer requirements so we can create the best product possible.
