

TOKYO ELECTRIC POWER SERVICES CO., LTD.

Company Description

Since our establishment in 1960, we, Tokyo Electric Power Services Co., Ltd. (TEPSCO) - a group company of Tokyo Electric Power Company Holdings, Inc. (TEPCO), one of the largest electric utilities in the world - have been providing top quality consulting services (civil, architectural, power and mechanical engineering) to the electric power industry in Japan and worldwide.

We will proactively meet the demands of our clients worldwide for diversified energy and environmentally-friendly/resilient infrastructure including disaster prevention. Our expert team will be your reliable partner, delivering full project cycle services from studies, planning, construction supervision, facility diagnoses through to operation and maintenance.

Our Mission

By mobilizing our technology we innovate for tomorrow. TEPSCO is at the cutting edge of electric power sector developments in Japan and worldwide. Our expert team of professionals is focused on creating custom made solutions for challenging infrastructure projects, which enables us to exceed clients' expectations and contribute to society.

Services

- **Thermal Power**

The thermal power plants are famous for their world class energy efficiency. TEPSCO has for many years been supporting the operations and maintenance for these plants.

- **Hydropower**

TEPSCO has also been engaged in many projects worldwide, including in Indonesia, Malaysia, India, Vietnam, and Bangladesh. TEPSCO can provide the wide-ranging engineering services.

- **Transmission and Distribution**

Based on the latest technology, TEPSCO can propose a total energy solution for energy conservation, energy savings and harmonization of the surrounding area.

- **Renewable Energy**

TEPSCO is proactively advancing new technologies in the field of renewable energy sources like solar, wind and small hydropower to harmonize society with the natural environment and economic growth.

- **Diversification**

We are an accomplished team of power sector professionals, a global business that contributes effectively to our planet.

Worldwide Experiences

We have been executing more than 885 consulting service contracts in more than 90 countries and expanding areas and fields of activities. Our wide experiences deepen our know-how and enable to deliver reliable results.
