

FWINES Co., Ltd

Company Description

We Fwines, as an importer of high-quality wines from all around the world, are doing our best to pass pleasure and emotions on to every wine lovers. We keep making effort for being a company to provide richness to consumers' life.

We brings the "Blessings of Nature" and "Passions of the Producer" a joy which we seek to share and spread.

About our Quality Control

- "100% reefer" principle

"100% reefer" refers to the transportation of our imported wines in refrigerated shipping containers, also known as "reefer" containers, which keep the wines at a constant temperature throughout the entire journey across oceans and over land, from the producers to customers.

Flavor of wine is affected by environment. When shipped and stored at appropriate temperatures, wine will retain its genuine taste. However, when wine is in an improper environment, its flavor would change.

As a wine importer, we thought about ways to deliver these "Blessings of Nature" and "Passions of the Producer" the way they are, resulting in the introduction of our "100% reefer" principle.

The word "reefer" is not native to the wine industry. For instance, one can refer to a product as "reefer" only if a reefer container is used during the maritime shipping process. We choose the "100% reefer" wording because a constant temperature is maintained the throughout our entire shipping process; at sea and even on land.

About our Logistics

To remain committed to quality control over our wines, we are using a distribution using a distribution center in Yokohama (Yokohama-shi, Tsurumi-ku, DaikokuFuto) provided by Teisan Warehouse Ltd, which has been operating since January 5, 2006.

This distribution center is a high-tech constant temperature and humidity warehouse, featuring an installed dock shelter system that keeps our sealed pallets airtight. This enables the temperature and humidity to be kept completely constant during loading, storing, shipping, and unloading.

Our integration of storage and shipping into a single warehouse in Teisan Warehouse enables the shipping of our imported products. The distribution area of 15° C wine cars has been expanded to Kyoto, Osaka, Hyogo, and Aichi, which is in addition to the existing Tokyo, Kanagawa, Saitama, and Chiba areas. We assure of the quality of our wines until they are in the hands of our customers.

Company Details

Head Office

Japan

Main Business

ファインワインを中心としたワインの輸入・販売（調達～保管～配送まで一貫した定温管理の実施）

President
