OKANO ELECTRIC CO,.LTD. | オカノ電機株式会社

OKNO ELECTRIC CO,.LTD.

Company Description

Company policy

Okano Electric has been developing our business for more than half a century with the motto of "match the customer's needs". We continue to fulfill our social responsibilities by cultivating excellent independent technology, looking to the bright future, respecting the individuality of our employees, and challenging new possibilities. In addition, our basic philosophy is to contribute to society by providing outstanding products considered safety, quality, and environment aiming customer's satisfaction.

Okano Technology

FA customized solutions
Most of the products made by Okano are the customized systems to match the customer's requirement and production facility. Since we developed the world's first analog in-circuit tester which is now the standard for print circuit board test, we have consistently performed development, design, manufacturing and installation work, and we have cultivated experience and know-how to meet customer's needs.

We have delivered our systems with our three main technologies, which is Okano original "Image processing technology", "Handling technology" based on our know-hou over 50 years of experience, and "Measurement technology". Okano has abundant experiences, achievements, and know-how focusing on the customer's requirement. For instance, we have provided the handling systems with 1μm placement accuracy according to our customer's needs. In other case, we have created our original visual inspection algorithm born from various inspection requirements from our customers. Therefore, it is possible for us to make our proposal that meet customer needs. We continue to provide customized systems by making full use of our outstanding technical capabilities and abundant experience.
Our factory automation systems created by the reliable technology is available in a wide range of industrial fields such as the electronic / electrical industry, communication industry such as mobile phones, hard disk industry, medical industry, tool industry, transportation industry such as automobiles, and food industry. Also, we are able to provide the solution for enhancement of the customer's facilities with our systems.

Company Details

Head Office
Japan

Main Business
FA装置/外観検査装置/カスタムオーダー装置、基板実装工程向け装置、サイネージ関連製品、特殊機オーダーメイド装置製作、インサーキットテスターなど計測業務、サイン事業

President
岡野　広明

Established
1969年6月

Capital
1000万円

Number of Employees
101 - 500
