

IKUTA

Ikuta Sanki Kogyo Co., Ltd.

Company Description

Expanding our business from copper rolling to synthesize realm

IKUTA as an important maker of rolling machines has developed a great variety of high level equipments to contribute copper strip rolling world.

Our business is not constrained in the copper strip rolling world and it is expanding into some other realm as well. A lot of know-how and considerable experience have been obtained as a solid foundation for it. Nowadays, our machines are applying to wire and rod manufacturing even to the other material such as steel, stainless, synthesize and so on. IKUTA has been contributing its technology to the world to meet our customers' demand.

We contribute high quality superior technology to the world

In 2002, IKUTA established a 100% subsidiaries in Suzhou China, then gradually, expanded the overseas customers to Germany, Bulgaria, Turkey, and Thailand as well. And eventually, IKUTA decided to start full-scale development of overseas business.

In recent years, our overseas business and activities are becoming more serious and more energetic. There was a built-to-order manufacturing of metal resin lamination line to Europe factory by major domestic composite manufacturers. Also, the first big challenge to the exhibition of EuroBLECH 2014, an international sheet metal trade fair, in Hannover Germany has been done.

Innovating for the future

In order to be a more energetic company, IKUTA has been actively adopting new graduates and the middle of technical employees, it is also very much focused in adoption of foreigners too.

Nowadays, IKUTA has been strongly working on overseas expansion, but it has been expected more. There is a plan to establish a subsidiary in Turkey during the fiscal 2015.

Fortunately IKUTA is celebrating its 100th Anniversary in coming 2019, but is already facing towards the next century. IKUTA will carry on its 100 years tradition but keep challenging for something new and for glorious and brilliant future.

Company Details

Head Office

Japan

Main Business

・金属生産設備の設計製作 ・産業用自動化機器の設計製作 ・研究開発用機器の設計製作 ・産業用ソフトウェア開発 ・各種装置の撤去、移設、据付、改造工事 ・各種装置のオーバーホール（他社製設備にも対応します・日中貿易、中国での商品販売コーディネート、事業サポート
