Seedea Corporation

Company Description

As an advanced manufacturing strategic partner

Since its establishment in 2004, Seedea Corporation, as a trusted technology service partner, has been providing solutions to customers all over the world with LSI Development, Embedded Software, IT and Infrastructure Products.
We have grown not by pursuing the expansion of the company or competing with other companies, but rather through a desire of all the employees to find satisfaction and pride in pursuing technological capabilities while taking every action to always meet the customers' expectations.

We can perceive and solve both immediate and unforeseen problems. We are convinced that continuing to grow while placing importance on technologies and solutions will create value tailored to the times not only for our company, but also for our customers.
We will continue to strengthen partnerships with our customers, support business strategies, and implement solutions that will lead to success.
